

### Before

Prior to Mr Wright installing solid wall insulation his home was expensive to heat and was getting cold as soon as the heating went off.

#### Problems

- high energy bills
- damp issues
- difficult to keep warm

Mr Wright, a Woking resident had external solid wall insulation installed through Action Surrey's help and support in 2014.

He recommends Action Surrey, believing that the installation was a good idea and that it was "well worth the money". Mr Wright does not believe it will take him long to "pay it back through savings" on his energy bills.

### After

Mr Wright was very pleased with the installation and is keen to praise the installers "the guys that worked here were absolutely brilliant, they actually did more than they needed to". A bonus has been the new, improved appearance of the property and Mr Wright is happy that "the property looks so much better than it did".

#### Benefits

- "stays warm for longer...it holds the heat in".
- improved appearance.
