

## Streets Ahead case study

### Before

Mrs Gunasekara was keen to improve the warmth and comfort of her home, and after installing loft insulation, wanted to explore solid wall insulation.

#### Problems

- ③ freezing cold
- ③ had a slight damp issue

Mrs Gunasekara, a Farnham resident, had external solid wall insulation installed in 2014 through Action Surrey's advice and support, which included a £6,000 grant.

She would recommend Action Surrey to anyone who would like to install energy efficiency improvements, particularly due to the streamlined service in 'doing all the donkey work' for her.

### After

She was extremely pleased with the support and funding that was provided by Action Surrey, stating that she 'couldn't have afforded it otherwise'. She also stated that it was worthwhile for the improved look of the property in addition to other benefits. She would also recommend the Streets Ahead project as it provides residents with a range of competitive quotes for solid wall insulation.

#### Benefits

- ③ house looks better
- ③ the insulated front of the house feels warmer when compared to the back

**Streets  
Ahead**
